WHY BUY **Littelhome** IMMERSION WATER HEATER

Even though immersion water heaters are being used for many years to heat water, they have always been considered risky. We at INDOMA, have revolutionized the industry by introducing the first shock safe Immersion Rods. It's goodbye to your fear of shocks.

INNOVATIVE

Specially protected connectors. First time designed by INDOMA.

SHOCK SAFE

Safe even if the rod accidentally falls completely in the water.

SUPER DESIGN

Beautiful attractive design, available in various colours.

PREMIUM

Our new innovative products are often copied but never equalled.

BIS QUALITY MARK

A quality that surpasses BIS standard

INDOMA - KNOW US BETTER

We at INDOMA always believe in doing something different. We revolutionized the industry by introducing the first shock safe immersion rod. It's goodbye to your fear of shocks.

This is not first time INDOMA has done something different. It revolutionized the desert cooler industry earlier in 2002 by introducing **Littelpump**® the world first submersible pump for the cooler industry.

We have also brought more revolutions by launching world's first portable cooler.
